

uLock

AWDL uLock, a New Lock of a New Era

SECURITY

With the Bluetooth 128-bit Advanced Encryption Standard implemented, uLock is UNHACKABLE and can ONLY be operated by a device which has been successfully and securely paired.

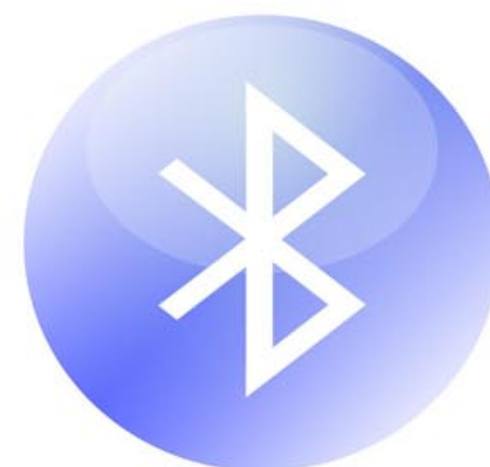

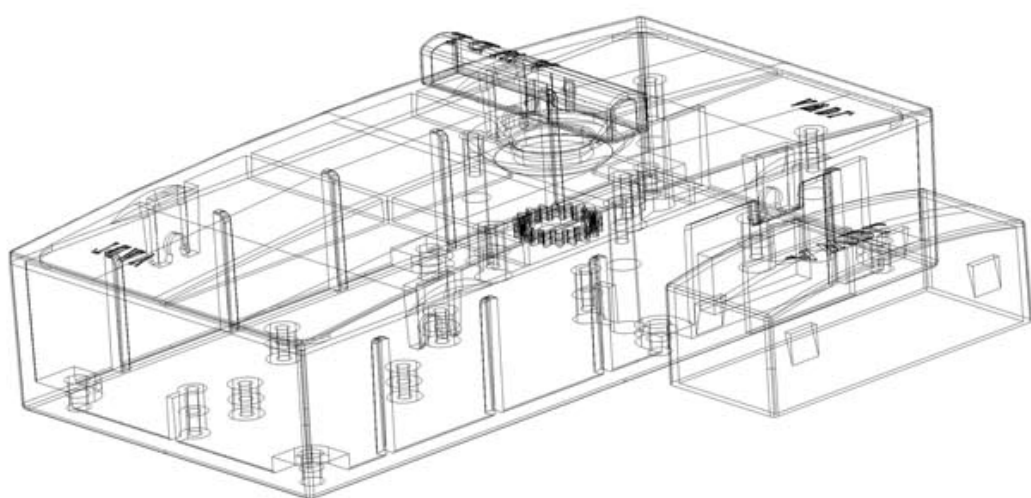

CONVENIENCE

In addition to the need for no locksmith on installation, the AWDL FREE App enables users to check uLock statuses, the battery life and transactional log anytime.

CREATIVITY

FIRST EVER multi-patented, revolutionary invisible uLock on the market that empowers YOU to operate via a smartphone and retires your conventional keys.

RELIABILITY

Dual power systems, multi-level warning mechanism, and the RESET function to be used in the event of loss of any existing paired devices bring you greatest PEACE of MIND.

QUALITY

Designed by a certified "American Society of Quality" Black Belt Engineer and an award-winning Industrial Designer, uLock is of the highest quality coupled with an aesthetic exterior.
